

## DOWNLOAD & SET-UP GUIDE

### Why download the FREE App?

Network Visibility & Management

Run Speed Tests  
Reboot Router

Share Wi-Fi with  
QR Code

Create Guest  
Networks

Parental Controls

Device Prioritization

Cyber-Secure 3.0

### How do I start using the App?

This step-by-step guide will help you easily download, install, and set up this free app on your mobile device (phone or tablet). Whether you're using an Apple iOS or Google/Android device.

#### Overview:

1

Download  
the app

2

Create your  
account

3

Connect to  
router & devices

4

Customize  
profiles &  
controls

## Step-by-Step: One-time set-up

Scan the appropriate QR code OR  
Click the icon on your phone or tablet: Apple

Google

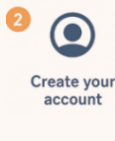

Tap type in Lakeland Networks IQ

Open

Lakeland Networks, a Divi...

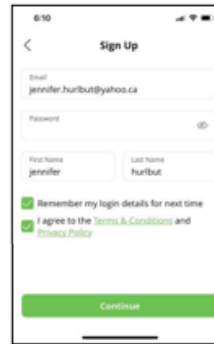

Type in your email, click [Continue](#)

Complete the form (password min 8 characters)

tap the two check boxes, click [Continue](#)

[Allow](#) face id sign-in or click [Maybe Later](#)

The App helps facilitate the set up of your equipment ie. router/wi-fi/wi-fi extenders in your home. Your System is likely already set up and you have internet – so you can pass over any of the System Setup prompts.

Click [My System and Wi-Fi Are Already Set Up](#)

The router is the device or “box” that connects your home to the internet and then shares it with all your devices, usually via Wi-Fi.

**Connect Router to App** - you need to be by your router

-[Allow](#) camera access as you will need it to scan

-Point the camera at the QR Code on your router & scan

The identifier information will automatically populate

There is an option to Manually enter the details if needed

-Click [Start Setup](#) - you will now be on a screen titled *Setup Wi-Fi*

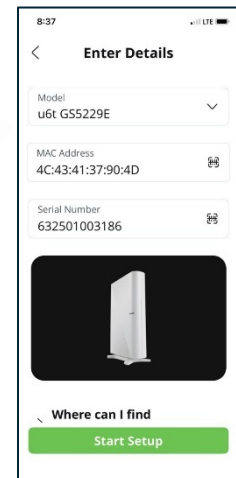

Your network Name, Wi-Fi Password and Security will populate

Network name is what will be seen when someone looks for an available Wi-Fi network to connect to. If you want to change name/password, then tap on each and change it, Tap [Done](#).

-Click [Skip](#), [My Wi-Fi is already Set Up](#)

Your Mesh Units, also known as Wi-Fi Extenders, will also likely be already set up so you can skip this by -clicking [Not Now](#)

If you want to modify the names/passwords do so the same way as above by clicking on [Set Up Mesh Unit](#)

**You're now ready to start using your App!!**
